

WELL-CHILD CHECK CHART

Visit & Immunization Chart

LAWNDALE CHRISTIAN HEALTH CENTER

Loving God. Loving People.

WWW.LAWNDALE.ORG | (872) 588-3000

This chart lists important vaccines and tests for your child's development, as well as recommended well-child visits. We also recommend all children aged 6 months and older get a flu vaccine every fall.

In addition to these visits, call or visit your child's LCHC provider any time your child seems ill or whenever you are worried about your child's health or development.

Same day appointments are available. Call early in the day for best availability.

- Newborn visit
(Hep B, if not done at hospital)
- 7-14 days
- 2 months
(DTaP, Hep B, Hib, PCV, Rotavirus, IPV)
